

Globalization, Culture & Identity

Instructor/Title	Assistant Professor Dr. Nur Rafeeda Daut
------------------	--

Course Outline

This course aims to put the contemporary discussions of globalization within the context of social, cultural, personal and national identities. Specifically, it focuses on how globalization affects the construction and formation of identities across cultures. Multiple narratives of identity (personal, social, ethnic, national, migration and others) will be critically examined. We will study the different ways in which Asian, Western and other communities interact and exchange ideas through culture and material goods. This course will also examine how different modes such as travel and tourism and globalizing forms of popular culture contribute to identity formation in various nations. The discussions and case studies will provide students with basic knowledge and understanding of various cultures and their values.

Course Objectives

By the end of this course, you will be able to:

- Understand the diversity of culture and values across nations.
- Understand the ways in which globalization influence identity formation in societies.
