[Course Outline / Description]

We analyze the high-growth period in the 1950s and 1960s, the bubble period in the late 1980s and the "lost decades" in the 1990s through 2000s of the Japanese economy from the viewpoint of Japanese financial system. In particular we focus on how the Japanese financial system has evolved in the postwar period and how it has affected the performance of the Japanese economy by way of changing the behavior of banks, firms and households.

Specifically, we examine how the bank's lending and portfolio behavior as well as bank-firm relationship changed after financial liberalization in the 1980s. We also examine how the firm's investment and borrowing behavior was affected when the bank-firm relationship changed. Finally, we analyze the household behavior in terms of consumption and saving choice in the course of a sharp rise and then plummet of the asset prices in the late 1980s to the early 1990s.

We pay special attention to the "lost decades" and describe the characteristics of the "lost decades" and then explain why it took so long to wipe out the aftermath of the "lost decades." We also evaluate Abenomics critically and discuss whether the Japanese economy has finally overcome the long stagnation. Finally, we touch upon the effects of coronavirus disease (COVID-19) on the Japanese economy.

Section 2

[Course Objectives/Goals/Learning Outcomes]

The students will understand how the Japanese economy attained high economic growth in the 1950s and 1960s, why the bubble emerged in the late 1980s and collapsed in the early 1990s and then why the Japanese economy was stagnant so long after the bubble burst in the 1990s and 2000s. The students can explain the causes and consequences of the bubble and the "lost decades" and the roles played by banks, firms and households. The students will also be able to do simple empirical analysis by collecting and analyzing economic data by statistical tools for themselves.

2023 Fall Semester

Section 3 【Class Schedule/Class Environment, Literature and Materials】

1Introduction to the course2Overview of the Japanese economy3Brief history of the postwar Japanese economy (1)4Brief history of the postwar Japanese economy (2)5Why did the Japanese save so much in the high-growth period?
