

Sustainable Development & Public Policy in Asia**Section 1**

Instructor	Kazuo Fukuda
Office/Building	TBD
Office Hours	TBD
Contacts (E-mail)	TBD

【Course Outline / Description】

In recent years, sustainable development has gained currency as the core concept of development in the worlds of scholars, practitioners, political leaders, the media, and the general public alike. Gone are the days of states pursuing their socioeconomic developments at the expense of the environment, the climate, the energy, and the people. Also gone are the days of the international community acquiescing to such modes of socioeconomic growth. In the era filled with grave concerns such as global pandemics, climate change, financial crisis, and persistent obstacles to realize full human development, “sustainable” is the new buzzword here to establish resilient and responsive environment, infrastructure, and mechanism at local, national, regional, and international levels so as to address such global challenges holistically and systematically. Adopted by all United Nations Member States in 2015, the 2030 Agenda for Sustainable Development essentially anchors such efforts towards sustainable development. At its heart are the 17 Sustainable Development Goals (SDGs) which call for urgent, concerted action by all countries in a global partnership. In its 75th anniversary in 2020, the United Nations reiterated the need for a sense of urgency to tackle global issues: “we are not here to celebrate. We are here to take action. Guided by the purposes and principles of the Charter, we are here to ensure the future we want and the United Nations we need.” In 2021, Secretary-General António Guterres echoed this sentiment: “the choices we make, or fail to make, today could result in further breakdown, or a breakthrough to a greener, better, safer future. The choice is ours to make; but we will not have this chance again.”

Against this background, students will engage with the world of sustainable development and Sustainable Development Goals in this course (both in general and in the Asian context). What is sustainable development? What are Sustainable Development Goals? What have been the prominent issues for the world and Asia? What have been the main achievements and challenges thus far in the world and in Asia? How have Asian countries addressed each SDG? What can we do at the individual level to help achieve these SDGs? Where do we go beyond the 2030 Agenda for Sustainable Development? Such are the main research/discussion questions for this course.

Section 2**【Course Objectives/Goals/Learning Outcomes】**

This course is designed to help students attain the following learning outcomes:

1. To learn and understand the essence of sustainable development, Sustainable Development Goals, and relevant public policies in Asia
2. To understand prominent sustainable development issues and challenges in general and in Asia
3. To critically analyze how to address global concerns and challenges at different levels
4. Link theoretical and empirical studies and apply analytical tools to countries of students' interests
5. Sharpen analytical, presentation, and writing skills on sustainable development

Section 3

【Textbooks/Reading Materials】

Readings will be assigned for each week. Students are required to keep up with a full schedule of readings. Reading assignments will be the basis for informed classroom discussions. Students are thus expected to answer questions about the readings when called upon to do so in class.

【Class Schedule/Class Environment, Literature and Materials】

NOTE 1: A more detailed syllabus will be shared with students.

NOTE 2: In each session, we will start with small presentations on sustainable development-related news by students.

Lesson	Topics	Readings
1	Course Introduction	<ul style="list-style-type: none"> - Please make sure to read the detailed syllabus carefully before the class! - Slobodan Perdan (2004), Introduction to Sustainable Development
2	What Is Sustainable Development?	Vision (<u>OPTIONAL READING</u>) <ul style="list-style-type: none"> - Gro Harlem Brundtland. Report of the World Commission on Environment and Development: Our Common Future (1987). Overview <ul style="list-style-type: none"> - Kates, Parris, and Leiserowitz (2005), What Is Sustainable Development? Goals, Indicators, Values, and Practice. Concept and Definition <ul style="list-style-type: none"> - Susan Baker (2006), Sustainable Development (Ch. 2: The Concept of Sustainable Development) - Additional Readings Theory <ul style="list-style-type: none"> - Armin Grunwald (2014), What Kind of Theory Do We Need for Sustainable Development – and How Much of It?
3	History and Various Dimensions of Sustainable Development 1 History and Actors	History <ul style="list-style-type: none"> - Stephen A. Roosa (2007), Sustainable Development Handbook (Ch. 1: What Is Sustainable Development?; <u>Read Only P. 26-54</u>) - Additional Readings Actors <ul style="list-style-type: none"> - Petrică Nițoiaia and Gabriel Camară (2018) Roles of Actors in Promoting Sustainable Development - Additional Readings
4	History and Various Dimensions of Sustainable Development 2 Various Dimensions of Sustainable Development	General <ul style="list-style-type: none"> - Jennifer A. 30	Wrap-up and Final Exam Preparation	No Assigned Readings (But Please Make Sure to Review All Areas Covered in the Semester and Bring Any Questions That You May Have)

Section 4

【Learning Assessments/Grading Rubric】

- Participation: 30%
- 2 Small Presentations on Sustainable Development-Related News: 5%
- Final Exam: 20%
- Group Final Paper: 30%
- Group Final Paper Presentation: 15%

Section 5

【Additional Information】

Syllabus

To the extent possible, we will proceed with our class in accordance with the course schedule stated above. Should the needs occur, however, the instructor reserves the right to modify the course syllabus during the semester. In such cases, the instructor will strive to inform students of any changes well in advance.

2023 Fall Semester

Academic Integrity

You are expected to adhere to the standards upheld by Kansai Gaidai University. Violations of academic integrity include cheating, fabrication, plagiarism, interference, violation of course rules, and facilitating academic dishonesty. When you submit an assignment with your name on it, you indicate that the work contained therein is yours, unless otherwise cited or referenced. Any ideas or materials taken from another source for either written or oral use must be fully acknowledged. If you are unsure about the expectations for completing an assignment or taking a test or exam, be sure to seek clarification from the instructor in advance.

Participation

In addition to the active participation in the classroom as mentioned below, students are expected to post (1) reflections and (2) questions for class discussion on Blackboard, based on the readings of each session. Please bear in mind that this is part of the participation grade. The main objective of this activity is not only to make sure that students keep up with the assigned readings but also to create a forum where they can exchange comments, thoughts, and questions with each other AND ensure lively debates in the classroom. As such, please post them prior to each session (at least a day before each session). Both reflections and discussion questions do NOT need to be extensive; short responses will suffice for this purpose. If you so prefer, you can simply list down your thoughts and questions.

Positive Learning Environment

As your instructor, one of my primary responsibilities in our classroom is to create a positive learning environment for all. I take this responsibility very seriously and highly encourage all students to actively take part in class debates. In fact, I have prepared sample class debate questions in the detailed syllabus. As such, any act of discrimination or harassment based on race, ethnicity, gender, gender identity, religious affiliation, sexual orientation, or disability will not be tolerated in this course. Let's show utmost respect for each other and create a positive learning environment together.
